

Calnex Solutions plc

Test solutions for the world's networks

Interim Results for the six months to 30 September 2020

Tommy Cook, CEO Ashleigh Greenan, CFO

The Board

Tommy Cook CEO

Founded Calnex in 2006

Over 35 years' experience in telecoms test and measurement, most recently at Agilent Technologies.

Engineering background and his expertise ranges from hands-on design, programme management of R&D projects through to leading business teams within the market segments in which Calnex currently operates.

Ashleigh Greenan CFO

Joined Calnex in 2020.

Previously CFO at Parsons Peebles Group Limited, global supplier of electromechanical products and services.

Prior to this she held finance and corporate development roles at Exova Group plc, the UK materials testing business.

Ashleigh qualified as a chartered accountant with Deloitte, before spending 5 years at KPMG in transaction services.

George Elliott Non-Exec Chairman

Extensive board experience at private and public technology companies.

Currently Chairman of Optoscribe Ltd and formerly Non-Exec Chairman of Craneware plc from 2007 -2019. CFO of Wolfson Microelectronics plc from 2000-2007.

Ann Budge Non-Exec Director

ExperiencedNon-ExecutiveDirector andAngelInvestor,particularlywithintechnology sector.

Co-founded Newell & Budge in 1985 before its sale to Sopra Group in 2005. Currently, Owner and Chair of Heart of Midlothian football club.

Graeme Bissett Non-Exec Director

Experienced corporate financier and qualified chartered accountant.

Former Chairman of Macfarlane Group plc and NED at SMS Group plc, having previously held NED and Finance Director roles.

Calnex Solutions: test solutions for the world's telecom networks

Globally-established provider of test solutions for the Telecoms Industry	 Designs, produces & markets test instrumentation to validate the performance of critical telecom network infrastructure Scottish HQ and manufacturing, with global distribution 	Revenue and EBITDA growth
High quality, growing, customer base	 Over 600 customer sites in 68 countries Customers include Network Operators (BT, China Mobile, NTT) Equipment Vendors (Ericsson, Nokia), Component Vendors (Intel, Qualcomm) and Hyperscale/ Enterprise (IBM, Facebook) 	8,000 4,000 2,000 FY18 FY19 FY20
Established industry position with reputation for winning products	 Close relationships with customers, regulatory bodies and leading market participants, provides insight into industry changes and customers' technology roadmap 	Revenue EBITDA including R&D amortisation (excl discontinued operations)
Strong financial track record	 Profitable, cash generative, with strong revenue profile Record order backlog going into FY21 with strong sales pipeline CAGR since FY15 of c. 16% Significant levels of repeat business 	BT (BT) (Dirac Mobile (Dirac Mobile) (Dirac Mobile) (Dirac Mobile) (Dirac Mobile) (Dirac Mobile) (Dirac Mobile) (Dirac Mobile) (Dirac Mobile)
AIM IPO to capitalise on market drivers	 Mass roll-out of 5G networks, IoT and cloud services creating rapid and long-term changes in telecoms market AIM IPO in October 2020: expected to support growth, increase profile and provide potential to expedite growth through M&A 	NDKIA Qualcomment IIII IIIIII

Focus on high value niches of the testing market

Calnex's Strategic Focus

R&D Design Validation and Conformance Testing

- Critical points in the development cycle, require high capability and high-value test equipment
- Fully prove the operation design and conformance with International Standards
- Stress test to ensure will operate under all conditions
- Repeated each time network equipment is upgraded
- Maintenance Testing post deployment
 - Deep insight is required to identify and rectify complex maintenance issues

Strong performance in the period

Successful IPO on October 5, raising £22.5m (£6m for the Company)

Resilient through COVID-19

Actions

- Quickly adjusted to remote working, and changed customer engagement approaches
- No staff furloughed or made redundant. All staff continue to work as normal
- Embraced video meetings to continue team interaction. Set up virtual coffee meetings, exercise classes, etc. to promote continued cross team engagements

Impact

- Customers successfully transitioned to remote working enabling projects to continue
- Some changes to spend patterns from top customers but overall, business remained strong
- Profit before tax benefitted from £0.3m savings in travel and events costs as a result of COVID-19
- No COVID-19 Government assistance
- No impact on supply chain or contract manufacturer

Looking forward

- We are a resilient business with repeat revenues and a robust balance sheet.
- We will continue to develop innovative product offerings to capitalise on the growth opportunities and generate sustainable revenue growth.
- Favourable market conditions continue into H2 FY21
- Strong growth in revenue from FY20 continuing throughout FY21 to date & order intake strong
- The Board anticipates FY21 financial performance will be ahead of current market expectations and H2 revenue and adjusted PBT will be broadly in line with H1 FY21

Pandemic has highlighted the world's requirement for robust, pervasive broadband delivered via resilient telecoms networks and infrastructure

Business Model

Revenue model

Warranty and support revenue - recognised over life of cover
 Hardware & Software revenue - recognised on despatch/delivery

- Core sales model is bundled Hardware & Software
 - Software options differ from customer to customer
 - Price per PO dependent on software options configuration
 - Additional functionality can be added later by purchase of upgrade Options
- Geographic spread provides resilience
- 80% of revenue over last three full years has been derived from Telecoms sector

Telecoms v Non-Telecoms orders

Non Telecoms Telecoms

Insight and Innovation

Repeat Customer Demand

- Top 10 customers account for just over 50% of revenues in FY20; balance is split across remaining customer base
- Average length of customer relationship for Top 10 is 9yrs
- Non Telecoms customers appearing in Top 10 in recent years; 14% of top 10 customer revenue in FY20

Revenue & EBITDA

- Strong revenue run rates continued from H2 FY20 into H1 FY21
- Gross margin 78% in the period. Product and bundle mix can result in variable margins if looking at half years in isolation
- Savings in travel and events costs due to COVID-19 driving Underlying EBITDA margin % up 4pps on FY20 (34% v 30%).
- IPO costs and IPO related share based payments treated as exceptional
- Adjusted PBT 30% versus and FY20 average of 26%

Cash at the end of the period 4,511 1,514 3,6	ash at the end of the period	4,511	1,514	3,664

- Robust cash flow performance due to strong trading in the period.
- Net cash from operating activities of £2.8m (£1.4m in H1 FY20), 81% conversion of EBITDA (59% H1 FY20).
- Working capital movements represented stock increases due to timing of product shipments and effect of FY20 year-end bonus payments in April 2020.
- Cash spend on financing activities predominantly monthly capital repayments on the ThinCats loan, (with IPO proceeds), offset partially by government grants cash received.

Market & Strategy

5G provides significant test equipment market

Global 5G Testing Equipment and Solutions Market Forecast to 2024 (Frost and Sullivan report):

- CAGR, 2018-2024 = 11.5%
- Market size 2021 = \$1.53B

5G Testing Equipment Market

Fragmentation of the market offers opportunity for consolidation

"\$1,058.2 million in revenue in 2018. 5G testing equipment used to validate the chipset, device, network and application accounted for shares of 29.9%, 23.6%, 41.9% and 4.6% respectively."

"The market is expected to reach \$2,033.8 million by 2024, expanding at a CAGR of 11.5%. Asia-Pacific (APAC) accounted for 42.5% of the total market revenue in 2018, followed by North America and Europe with shares of 32.4% and 19.5% respectively."

"Key growth drivers include specific solutions that can validate 5G-based devices and chipsets, virtualized network infrastructure, the overhaul of legacy network infrastructure and enhanced and differentiated security requirements for 5G deployments."

Frost and Sullivan

Growth strategy

Three pronged growth strategy to capitalise on structural market growth drivers				
Continued product innovation to capitalise on growth of 5G		Expand within the Cloud Computing sector and other market niches	Target select M&A opportunities to add to product portfolio	
	Follow the trends to higher transmission rates and track new standards to strengthen our product offering	 Create software-based Virtual SNE product to address migration of Telecom Network to Software Defined Networks (SDN) Opening opportunities into Enterprise to prove Application software developed in the Cloud. 	 Selective M&A activity, where complementary products or technologies can be acquired to enhance Calnex's existing portfolio In related or adjacent growth markets Must meet stringent criteria 	
H2 FY21 Objectives				
	ኯ፝ዹ፟ኯ፟ ዹ፟ኯ፟ዹ፟ኯ፟ዹ			
	Further expansion in our Business Development and R&D teams	Launch new capability for current platforms	Management and mitigation of any COVID related impact	

Outlook

Globally-established provider of test solutions for the Telecoms Industry

Established industry position with reputation for winning products

Strong financial track record

High quality, diverse, growing customer base

Structural market drivers present growth opportunities

Favourable market conditions continue into H2 FY21

Anticipated that revenue and adjusted PBT in H2 FY21 will be broadly in line with H1 FY21

IPO provides springboard to execute on growth strategy

COMPONENT MANUFACTURERS

NETWORK OPERATORS

5G driving market change

Enhanced Mobile Broadband

Faster, more uniform user-experience

Demanding indoor/outdoor conditions

Extreme mobile broadband (enhanced 4G) e.g. Ultra High Definition, Virtual Reality

Changes to Network and Technology

- New architecture (xHaul): centralised radio equipment, higher-speed interfaces
- Disaggregation/virtualization of network equipment
- 5G Radio network is Time Division Duplex
- 5G Radio deployment technique means different networks can cause interference

Massive Internet of Things Very high numbers of low-data rate machine-to-machine connections

New form factors e.g. wearables, sensors

Smart cities, buildings, homes

• Densification including Small Cells causes added interference

• Deployment of new Network Slicing technology required to handle the massive volume of connections

Mission-critical Control Ultra-low latency and high reliability

Autonomous vehicles, object tracking, robotics, automation, remote control

Critical infrastructure protection and control e.g. Smart Grid

- Enhanced positioning requirements demand tighter sync specs
- Computing to move to the edge of the network and latency will be critical
- Deployment of new Network Slicing technology required to handle the massive volume of connections

Rapid evolution of wireless telecoms market

Competitive Positioning & Barriers to entry

- Longevity & depth of customer relationships demonstrate reputation in the industry and trusted partner status
- Close relationships with customers, regulatory bodies and leading market participants, means consistently first to market with new technologies
- Highly focused on R&D, IP and product development
- Complexity and sophistication of platforms increases adaptability and differentiates Calnex from the competition
- Global network of resellers and distributors provides established route to market and additional barrier to entry for new participants

	Lean business model, with global distribution channels in place and manufacturing outsourced to a high quality local partner					
	Distribution channels		Manufacturing capability		Operational excellence	
-	Global reach through network of regional resellers and distributers	•	Manufacturing outsourced to Kelvinside Electronics since 2007	•	Young business but experienced leadership team	
Ì	Long-term relationship with Spirent Communications Inc, includes US, China and India (71% of FY20 total sales)	•	Kelvinside Electronics operates from a custom built 40,000 sq ft facility located in Kilsyth, Scotland	Ì	Large company structure, with sophisticated R&D processes Successful expansion through product and	
Ì	Calnex maintains direct contact and ongoing relationships with underlying customers, due to highly technical sales process	•	Calnex represents over 20% Kelvinside Electronics' revenue Real-time sales information enables optimisation of procurement and production schedules	•	technology acquisitions Proven ability to integrate bolt on acquisitions who benefit from access to global sales channel and increased R&D structure	

Maturity of the operational model combined with agile methodology provides scalability and adaptability

Snapshot of the complexity ahead: the evolving shape of mobile transport

 What has previously been a consistent topology with all the mobile basestation equipment situated at the mast site, now will have equipment split and dispersed with varying topologies between deployment to meet the needs of each location.
